EXPERIENCE

Florida International University (BabyFeed Web Application)

Miami, FL

Full Stack Developer

Aug. 2020 - Dec. 2020

- o Scrum Methodology: Worked collaboratively with a team of five developers and the product owner in a series of 2 week sprints. Utilized Scrum Agile Methodology for project management and organization (Daily Scrum Meetings as well as Sprint Planning, Retrospective and Backlog Grooming Meetings)
- o Research Portal: Designed and developed the Research and Participant portals. These new additions to the application allows researchers from an institution to create participant accounts in bulk. Additionally researchers can analyze and evaluate the participant's Frequent Food Questionnaire Data.
- o Data Export: Developed a data export feature utilized by Researchers and Clinicians to extract all their user data into a multi-sheet spreadsheet
- BabyFeed: BabyFeed is a web application that allows clinicians, parents and researchers to record and evaluate an infant's nutrient intake.

SparkDev Miami, FL

Android Developer

Aug. 2019 - Dec. 2019

- o Front-End Development: Implemented several dynamic UI elements as well as features utilizing the Google Maps API and Firebase
- RideFIU: Worked alongside a team of 10 students to develop RideFIU a ridesharing system built as a native Android mobile application

Publix Miami, FL

Grocery Clerk

Nov. 2016 - Present

- o Customer Service: Utilized my knowledge of product and inventory to assist customers with any inquiry and provide premier customer service
- Inventory Functions: Performed a number of inventory functions, organized stock, replenished stock levels, broke down and set up displays on the sales floor.

Projects

- VincentVictoreroSC Web Application: A web application for a strength and conditioning coach, built to advertise as well as organize his business. Includes features allowing prospective clients to fill out a form which can then be reviewed by an administrator. The administrator can also add and update static information on the site. Built using MongoDB, Express, React.js and Node.js
- Global View: A web application which features live video feeds from open web cameras around the world. Built using Python, Flask and OpenCV

SKILLS

- Programming Languages: Python, JavaScript, Java, C, SQL, HTML, CSS
- Technologies: React, Git, Express, Flask, Bootsrap
- Languages: English(Full), Spanish(Native)

EDUCATION

Florida International University

Miami, FL

Bachelor of Science in Computer Science
